

Welcome to manjaro i3!

For the graphical installer press **mod+i**, or start **gksu Calamares** with dmenu (**mod+d**) or for CLI-installer run '**\$ sudo setup**' in a terminal window (**mod+Enter**).

The default mod-key is **<Super>** (Windows-key).
You can change the gtk-theme with **lxappearance**.
For wallpaper selection use **nitrogen**.

Most important shortcuts

open new terminal window - **mod+<Enter>**
kill focused container - **mod+<Shift>+q**

tile vertically - **mod+v**
tile horizontally - **mod+h**

switch to workspace number 1-8 - **mod+1-8**
navigate between workspaces - **mod+<Ctrl>+<Right>/<Left>**
send focused container to workspace number 1-8 - **mod+<Ctrl>+1-8**
move to workspace 1-8 with focused container - **mod+<Shift>+1-8**
workspace back-and-forth – **mod+b**

move container to workspace back-and-forth – **mod+<Shift>+b**

resize container - **mod+r** followed by arrowkeys or j,k,l,ö

(exit resize mode with **<Enter>** or **<Esc>**)

move focused container to scratchpad - **mod+<Shift>+-**

show (next) scratchpad window - **mod+-**

Change desktop layout

stacking - **mod+s**

tabbed - **mod+w**

tiling / toggle split – **mod+e**

Change window borders

none - **mod+u**

2 pixels - **mod+y**

normal - **mod+n**

reload the configuration file - **mod+<Shift>+c**

restart i3 in-place - **mod+<Shift>+r** (preserves your layout/session, can be used to upgrade i3)

lock screen / switch user - **mod+9**

exit session - **mod+O** and choose (l)ock, (e)xit, (s)uspend, (h)ibernate, (r)eboot, (<Shift>+s)utdown
(cancel with **<Enter>** or **<Esc>**)

or

exit i3 - **mod+<Shift>+e** (logs you out of your Xsession)

All i3 settings, can be edited in ~/.i3/config

These custom bash aliases (terminal shortcuts) have been included

- **update**=sudo pacman-mirrors -g && yaourt -Syua && sudo pkgcacheclean && sudo pacman-optimize && sync
- **fixit**=sudo rm -f /var/lib/pacman/db.lck
- **upgrade**=yaourt -Syua
- **con**=nano ~/.i3/config
- **comp**=nano .config/compton.conf
- **printer**=system-config-printer

HAVE FUN ! 8^}
