!! All i3 settings, can be edited in ~/.i3/config !!

These custom bash aliases (terminal shortcuts) have been included:

- alias **fixit**='sudo rm -f /var/lib/pacman/db.lck'
- alias **update**='yaourt -Syua'
- alias **con**='nano ~/.i3/config'
- alias **comp**='nano .config/compton.conf'
- alias **inst**='sudo pacman -S'
- alias **mirrors**='sudo pacman-mirrors -g'
- alias **timeset**='gksu timeset-gui'
- alias **printer**='system-config-printer'

HAVE FUN ! 8^}
